Summary

Software Development Intern with 1+ year of hands-on experience building production web applications with Java, Spring Boot, and React/Thymeleaf. Currently building Jaldi, a multi-vendor e-commerce platform spanning customer, merchant, and admin workflows, covering product catalog, cart, order management, and Razorpay payment integration. Strong foundation in REST API design, microservices, relational and NoSQL databases, and data structures & algorithms.

Skills

Languages: Java, C, C++, JavaScript
Backend: Spring Boot, Spring MVC, REST APIs, Microservices
Frontend: React, Vite, Thymeleaf, HTML, CSS, Bootstrap
Databases: MongoDB, MySQL, PostgreSQL, Oracle
Integrations: Razorpay Payment Gateway
Tools & Practices: Git, GitHub, Postman
Core Concepts: Data Structures & Algorithms (DSA), OOP

Experience

Software Development Intern September 2025 – Present
Xansa IT Solutions

- Build and maintain production multi-role web applications using Spring Boot with MongoDB/MySQL, and React (Vite) or Thymeleaf on the frontend, exposing RESTful APIs consumed by customer, merchant, and admin interfaces.
- Design and implement RESTful microservices using Spring Boot, decoupling core modules to improve scalability, fault isolation, and maintainability across projects.
- Contributing to backend and frontend development on Jaldi, a multi-vendor e-commerce platform, working on the product catalog, cart, order lifecycle, admin approval workflows, and Razorpay payment integration.
- Contributed to 3 earlier company projects (HotOrNot, HealthSathi, Samvaad) across the full development cycle, using Postman for systematic API testing and Git/GitHub for version control in a team setting.

Projects

Jaldi – Multi-Vendor E-commerce Platform

- Architected a single platform connecting customers, merchants, and admins for local shopping, with role-specific workflows for each user type covering browsing, cart, checkout, shop management, and admin approvals.
- **Technologies:** React (Vite), Spring Boot, Microservices, MongoDB, REST APIs, Razorpay, Postman, Git/GitHub.

HotOrNot – Interactive Rating Web App
Live Link

- Built a platform for users to rate and compare profiles with a responsive, dynamic UI and real-time interaction handling focused on user engagement.
- **Technologies:** Spring Boot, Thymeleaf, JavaScript, HTML, CSS, PostgreSQL.

HealthSathi – Healthcare Management Platform
Live Link

- Built a platform to manage user health data and services with a user-friendly interface and backend integration for health record and service data.
- **Technologies:** Spring Boot, Thymeleaf, MySQL.

Samvaad – Coaching Management System
Live Link

- Built a system to streamline student enrollment, batch scheduling, and fee tracking, with role-based interfaces for administrators, teachers, and students, plus attendance and performance tracking.
- **Technologies:** Spring Boot, Thymeleaf, PostgreSQL.

Education

B.Tech in Computer Science (Artificial Intelligence) 2023 – 2027
RGPV University

Higher Secondary (PCM) 2021 – 2023
Gov. Higher Secondary School, Futera Kalan, Damoh
